## **Ford 1979-93 Mustang Aluminum Radiator Installation Instructions (Read Carefully Before Starting Project)**

Thank you for purchasing Granatelli Motor Sports' Mustang aluminum radiator. Our radiator features precision welded, 3" thick, large 1" aluminum cores, 28 or 31" width (depending on model), double row construction, and premium quality hardware. Like all Granatelli Motor Sports products, great pride and precision craftsmanship went into making this radiator.

### **MOUNTING:**

1. Side Tanks should rest on the lower mounts, not body of radiator.
2. Upper mounts should rest on ends of core, riding the edges between where the tanks meet the body of the cores. Note: due to slight variations in 79-93 core supports, upper hold down brackets may require slight modifications to achieve that OEM Look.
3. Air always seeks the path of least resistance. Therefore, for maximum cooling, seal front perimeter of radiator to air inlet. This will force as much air as possible through the core.
4. A pressure release cap should be installed that will maintain a minimum of 17 lb. of pressure but not exceed more than 24 lb.

### **MAINTENANCE:**

1. While engine is running, fill radiator. For best results it is best to jack the front end of the car up as high as possible. This will prevent the formation of air pockets in the cooling system. Aluminum radiators must not be subjected to pressure surges caused by air pockets.
2. When permitted, we recommend the use of aluminum safe coolant mixed with distilled water. Never run coolant mixture over 50%.
3. Always keep the cores clean. When cleaning cores, be sure not to bend the fins. However, if you do bend them, carefully straighten them.
4. Good airflow through radiator is the key to maximum cooling. Overheating may occur if air cannot properly move across the cores.

### **CAUTIONS**

1. **Always flush your entire cooling system prior to installing your new radiator.**
2. **Improper filling of radiator can damage cores and/or tanks.**
3. **Attaching a ground strap to the radiator eliminates the chance of electrolysis.**
