Adjustments

Your Granatelli Motor Sports Lower Adjustable Panhard Rod allows you to center the rear end (wheel and tire spacing relative to the fender) "true" to the body. **WARNING: You must check the position of your rear end and adjust to center position BEFORE driving. Failure to do so may cause sever tire damage, bodily harm and even death.** Check the position of your rear end by following the instructions below. Counter clockwise rotation will push the passenger rear tire out and clockwise rotation pulls the passenger side in. It should go without saying that the entire rear end moves in unison. Therefore, once you have set the location of the rear end, it is important that you tighten the locking nuts on both sides of the bar.

Have fun and feel the difference.
